TITLE : MANNEQUIN BODY HAVING
MOVABLE ARM PART

ABSTRACT : PROBLEM TO BE SOLVED: To reduce weight, facilitate handling, make a mannequin body strong, improve workability such as assembling, transport and storage, easily change a color and a pattern of an external facing by coating and transfer (print) after manufacture, and make various design.

SOLUTION: A mannequin body has an arm part 2 composed of a hand part hollow body 20, a front arm part hollow body 21, an upper arm part hollow body 22 and a shoulder joint part hollow body 23 composed of a hard raw material, connecting members 3 are respectively arranged between the respective hollow bodies of the arm part 2, and the respective hollow bodies 20, 21, 22, 23 are connected so as to be freely bendable. In an underpants style mannequin body having a movable arm part, a stand installing part 4 for engaging with a hollow inner wall is arranged above a lower end surface 120 of one leg part 12 of an underpants style.
